Professional Experience

A systems engineer by training, I am a highly driven professional with now over 10 years of experience in internet service ventures and project management. In the past 5-6 years, I have taken the role of thought leader and convener of people, science and ideas on the subject of information integrity, misinformation and human-AI interaction. My core skills are project and team leadership and management. In addition to that, I have organized and chaired several global conferences in academia, industry, and civil society about trust online and disinformation. My expertise encompasses research, knowledge production, successful proposal writing and administration, human resources activation, interpersonal and context-aware communication, mentoring and coalition-building.

- Human-AI interactions and persona-based adversarial testing (red-teaming)
- Fluent in Arabic (MSA, Levantine), French and English
- Customer relationships management and customer operations, including ticketing tools such as Zendesk
- Grant administration, financial and budget planning, and management
- Expertise in costs and budget management, research, knowledge production, and coalition building

Work

OpenAI

Independent Contractor, OpenAI Red-Teaming Network

Toronto, Canada
October 2023 – Current

- Participated in OpenAI led red teaming efforts to assess the risks and safety profile of OpenAI models and systems.
